

List of Local BBS's in the 416 dialing area / \ / \
 Researched by Wayne Finlay with help from the user on SOFTOR Systems \ / \ /
 Many validations made by The SOFone Automatic BBS Validation System / \ /
 Making BBS lists since May 16, 1984. \ /
 Update - Monday January 4, 1988.
 List Valid from January 4, 1988 to March 1, 1988.
 Next update will be released January 18, 1988 (I hope!)

Copyright 1987 1988 by SOFTOR Computer Products

This listing may be copied and posted on any BBS as long as the credits are not altered. Please give credit where credit is due.

SOFTOR Computer Products is not responsible for errors in this BBS list.

If you find an error in this list then PLEASE contact SOFTOR Systems at 265-8253 or via Fidonet to 148/216. Thanks!

Legend: (After Phone Number)

+ indicates BBS is 300/1200 baud ! indicates BBS is 300/1200/2400 baud ^ indicates 300/1200/2400/9600 baud
 \$ BBS charges for use & new to list or changed info = Charge for Downloads only
 D Weekday hours W Weekend hours ? Info Missing (please help fill!)

Characteristic Column (Last Five Columns) Descriptions:

Column: 1 BBS run by/for a Club or interst group
 2 BBS run by a business
 3 RPG online
 4 Open only to specific computer types
 5 Private Board (Closed to public)

BBS Program Types:

Adam - B=BBCS	C=C-Net								
Amiga - B=BBS PC									
Apple - C=Core	G=GBBS	N=Nova	P=Protree						
Apple Mac - R=Red Ryder									
Atari - B=BB/ST	E=BBS Express	F=FoReM	M=Michtron						
Commodore - B=BIBBS	C=CMBBS	D=Dircon	G=Midguard	H=Hal	L=Lynx	M=Moffit	N=Nexus	O=Proscan	
	P=Punter	R=Darkstar	S=Spence	T=BBCS	X=6485	E=EBBS64			
IBM - A=Alchemy	B=BBS PC	C=CPC	F=Fido	I=IBBS	M=FoRuM	O=Opus	P=PC Board	R=RBBS	
	T=TTS	V=Vanguard	Y=Pyroto	S=TBBS					
TRS Mod 3&4 - F=Fast 80	M=MBBS	S=Syslink	T=TBBS						
Tandy Coco - A=Colorama	C=CoBBS	F=Four Star	K=Color-80	R=Rainboard					

All computer boards - Z=Home made (A lot of these are nice BBS'S!)

Notice: Where there is a [C-64] in the computer column it means that C-64 board supports colour graphics and may appear as junk to ASCII users.

Network Column - This column holds FidoNet, FoReM-Net and PunterNet node numbers. FidoNet can be found on BBS's running on an IBM or compatible computer where as PunterNet can only be accessed via a Commodore 64 or compatible computer.

PN=Punter Net ForeM=FoReM Net others are FidoNet

Valid - This column indicates when the board in that line was last validated (contacted). The date is in Month/Day format.

For a free demo of Compuserve, dial any of the above Compuserve numbers and type the following at each prompt.

Host:CIS
I.D.:77770,101
Password:FREE-DEMO

To gain info on the U.S.A. Tymnet call the corresponding Datapac number.
eg. 300 baud users call 868-4000, etc...

Type ".." if you log-on at 1200 baud or "." if you log-on at 300 baud.

You will then see the Datapac sign on message.

At this time, Datapac will not echo anything back at you.

To make Datapac echo what you type, key the following:

SET 2:1 <CR> <----- This turns on Echo

Now to goto the info section on tymnet, type:

P 13 106 <CR>

Answer the Password prompt with "INFORMATION <CR>"

Now follow the menu!

Note: To access GENie (General Network for Information Exchange) Type the following:

At prompt type: XJM11880,GENie

From here on in you're on your own!

Distribution Information:

The SOFTOR BBS List can be found on SOFTOR Systems and most all IBM Boards that support FidoNet.

If you would like the SOFTOR List automatically sent to your board via FidoNet please contact Wayne Finlay on SOFTOR System either personally at 265-8253 or via FidoNet to 148/216. A list of non IBM distribution points will be included in the next release of the SOFTOR BBS List. Next release is scheduled for March 1, 1988. Minor updates may be obtained from SOFTOR Systems every two weeks. Note that the file extension indicates the Julian date of release.

Other Boards (Non IBM) where you can find The SOFTOR BBS List

640-7055 Boonie Board

690-4921 Corner Store/Hobbit

BBS Events and Look-outs

+-----+

AMCO*Net is now called TriTek and is run by a Computer Consultant Company

A.M.C.I.S is now a private board. No new users are being accepted. This started as on August 19, 1987

The Assassin's Cove BBS is gone..in it's place is a Sysop's only board called TCSN. Sysops! This Board's for you!

Avinon System #1 has grown! They now have three lines and 230 Meg online! Quite amazing if you ask me! (A CD rom is in the works!) They are now up to 3 lines..two public. More lines are being planned for 1988! Sorry, no 300 baud callers allowed.

Back from the grave! Yes, RDS (Remote Data Systems) has finally gotten it's hard drive fixed. This is an impressive Coco board!

Binary Connection - This once little C-64 board is now all grown up! It now supports ANSI colour controls. If u have a PC with ANSI, this board is a must call!

The Forbidden Zone (run on an Apple) is now running new software under PRO DOS.

Keyboard will soon be getting a 600 Meg CD Rom and a 2400 baud modem!

Money&North operated by TVO is up again. It only has transcripts though. No files and no messages.

PC Flagship's user count down! PC Flagship is currently trying to get 250 paying users. When their goal is met they plan on adding a 71 Meg Hard Drive to the board.

KatNet II - plans are under way to set up a second Katnet in Oakville. Stay tuned!

KatNet I moving to 35 Meg! Plans are underway to add more space for February.

Any info on events or happening? Contact Wayne Finlay on SOFTOR Systems or any SOFTOR source board.

DIPLOMACY

Have you ever played the board game Diplomacy? If so, there is now a BBS in Toronto dedicated to the game! Only people interested in playing the game of Diplomacy should call. Announcement for new players and games will be made on the board and also on SOFTOR at 265-8253. There are currently two games on the go at the moment. More may appear. For more info contact SOFTOR or Diplomacy.

YORK UNIVERSITY

York University now provides a number of services for the people of Metro. To access thier services call the York Gateway at 736-5258 and enter either "10" to connect to the Faculty of Science BBS or enter "YORKLINE" to connect to the York Library reference centre. When I hear of any more service offered by York University I will post them in a future update.

Editor's Corner:

+-----+

What's new on this edition of the SOFTOR BBS List? A lot! We have added and changed several things. We currently produce two BBS lists. One is in 80 columns and the other is in 132 columns. The reason is simple. The 80 column list can be easily posted on

BBS's as a bulletin. We would like to encourage this as it makes Wayne feel proud of his work! The 132 column list is a giant that can be printed out on most all Dot Matrix printers. Set your printer into compressed mode and print out the 132 column list. Once it's finished, pick up the 132 column SOFTOR Super List. Look at it. Admire it! You hold in your hand many hours of work. You hold the most concise BBS List in all the land! (ahem...) Our goal was to make up a list, not only of BBS numbers, but of BBS list directory. Sort of like the Yellow Pages. We feel that the 132 column list has been successful and would LOVE to hear from those of you who use the SOFTOR BBS List. Let me know what you think of it. The only way I'll know that the SOFTOR List is being used, is if I get feedback.

Next, I would like to point out a small experiment. It's survival depends on your feedback. I have added a Characteristic Table to the last 5 columns of the SOFTOR List. Each space represents a board feature. For example:

```

                                :12345
654-8847+ Amiga Intuition.:24H:Amiga B:01/01 : :8-N-1: BBS for Club_Amiga :!..!.
                                ^ ^
                                : :
                                Column 1 & 4

```

This entry for Amiga Intuition tells us that, because Column 1 has a "*" in it, the board supports a specific Club. Looking at Column 4 we also see that the board is specifically orientated towards other Amiga Users. This addition is only experimental and if feedback is good we will expand it to include other things. Yet another tiny addition is the listing of node numbers for FidoNet and PunterNet. These numbers are accurate and I encourage all users to learn how use this information. It is an excellent form of communication and now the SOFTOR List makes it more convenient to use.

Once again, I have decided to add a listing of dead BBS's or suspected dead boards. I would also like to encourage Sysops to let me know if they have taken their board down so I can do the appropriate update to the SOFTOR List.

From now on I plan on doing updates to the SOFTOR List on a regular basis. New number and changes will be made when ever I find new numbers or other information changes. You will be able to tell when the SOFTOR List has been updated by looking at the extension. All releases will be dated in the Julian format. New release will try and be prepared ever couple of months. These release will then be upload to our source boards. Updated editions will always be found on SOFTOR.

I would like to take the time to point out a fact. The SOFTOR BBS List is protected by a Copyright. It has come to the attention of the Publishers of The SOFTOR BBS List that pirated versions of the SOFTOR List are being circulated. The pirated version does not even come close to the quality of the SOFTOR BBS List. If you find such a list on any BBS, please urge the Sysop of the board to do his board and users a favour and carry the real SOFTOR BBS List. Taking credit for some elses work is wrong so let's work together and try to stomp out these BAD pirated versions! Note that you can identify the pirated version by the "Public Domain BBS List" header at the top of the listing. If any lawers use the SOFTOR BBS List and want to make some money via a Copyright law suit contact SOFTOR Systems.
